

MORE FROM WOOD.

For the calm and relaxed
moments in life.
Egger PRO Comfort Flooring

Flooring Collection 2018–2020

A vertical strip on the left side of the page shows a close-up of a light-colored wooden floor with a natural grain pattern. A small, circular metal object, possibly a part of a door handle or a decorative element, is visible on the left edge.

Comfortable, warm under your feet, and silent:

EGGER Comfort Floorings characteristics guarantee that you can enjoy a relaxed and comfortable atmosphere.

EGGER Comfort Flooring
is a unique type of wooden
floor with integrated
comfort layers made
of cork.

The raw material cork is a true miracle of nature! Its sound and heat absorbent characteristics create a warm feeling when walking along with a quiet atmosphere. The cork we use for our flooring comes from the bark of the cork oak.

This renewable and natural raw material is the perfect basis for healthy living and ideal for rooms where the feel-good factor plays an important role.

Comfortable

The elastic cork layers create a gentle and soft feeling when walking.

Warm under your feet

Barefoot in all seasons thanks to the thermo-insulating cork cells.

Silent

Enjoy the room atmosphere with less noise due to integrated impact sound insulation with cork.

EPC012

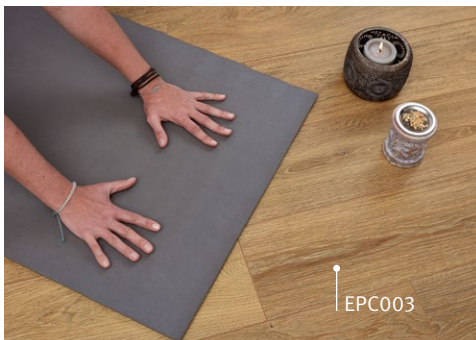

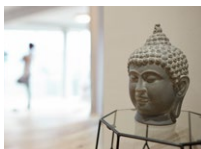

« I love having a good time with my friends.
We like to organise evenings where we play
games or watch films in our newly designed
living room. I really value our EGGER Comfort
Flooring. In addition to its modern appearance,
it is particularly comfortable, ecological,
and quiet. It is perfect for cosy evenings with
my friends! »

Alexander, architect

« Opening my own yoga studio was a lifelong dream come true. Yoga is best done barefoot, and when we do the exercises we constantly touch the floor. While I was looking for the perfect floor I was impressed by EGGER Comfort: a warm, soft, and ecological flooring that also absorbs sound. It magically creates a harmonious atmosphere in the room and supports inner peace during yoga. »

Tania, owner of a yoga studio

EPC027

« We want to spend the holidays calming down and relaxing. When we are on a city trip we enjoy our time in the hotel so we have a lot of energy to explore the new city. This is why, when booking a hotel, we look at the style but also its comfort and calmness. »

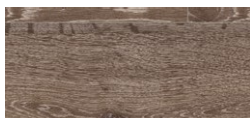

Nicole and Marc, entrepreneurs

Decor overview

EGGER PRO Comfort Flooring

Our Comfort Flooring is available in 28 different designs:
With elegant stone looks, woodgrain decors in classic and playful configurations, as well as exciting ornamental looks, we have an answer for almost all design styles.

High levels of comfort -
also when it comes
to cleaning

Thanks to the environmentally-friendly surface coating, EGGER Comfort Flooring is extremely easy to clean and insensitive to dirt. The floor is kept clean on a daily basis through regular vacuum cleaning and wiping with a moist cloth.

We recommend: EGGER Clean-it floor cleaner.

The structure

of the EGGER PRO Comfort Flooring

- 1 Environmentally-friendly UV protective layer
- 2 HD digital decor print.
- 3 Elastic Comfort cover layer made of cork.
- 4 HDF swell barrier+ coreboard made of natural wood fibre.
- 5 Integrated impact sound absorbing cork underlay.

The outmoded image of cork floors is a thing of the past: With the HD digital print technology, our Comfort Flooring is one of the most modern floor coverings out there. The direct printing of the decor image onto the upper cork layer creates a pin sharp and natural appearance. Thanks to an environmentally-friendly UV protective coat, Comfort Flooring maintains its colour even in the case of intense sun exposure.

Environmentally- friendly and contributing to a healthy home

The raw materials in the multi-certified EGGER Comfort Flooring originate from sustainably managed forests and controlled sources. They consist of 87 % renewable materials and are 100 % free of PVC. Our Comfort Flooring deserves the Blue Angel quality label.
